I will have Hanh do that and also request a copy of the final document when they are done.

Cindi,

Are we requesting quid pro quo information on the volumes injected from AOGCC. If not, we should.

Subject: Produced Water

Chris Wallace with AOGCC made the request because:

We have received a follow up request from John Veil who is working on a survey of States produced water disposal management practices in conjunction with the Ground Water Protection Council.

AOGCC, of course, has volumes for anything injected but only had a 2007 number for discharge. So thank you for Natalie's help in doing work we should have referred to you! 😊

I will send you the table when it is finished.

Cindi
